

SPECIFICATIONS PURSUANT TO CT6.74# - SLASH TREATMENT REQUIREMENTS (02/2002)

Leave Tops Attached (LTA) Cutting Units: All areas designated for skyline yarding.

Purchaser shall leave the tops of felled trees attached to the top log and yard them to landings, as shown on the Sale Area Map.

Logs will be cut to not exceed 45 feet prior to yarding unless otherwise approved by the Forest Service.

Pile Landing Slash (PL) Cutting Units: Applies to all tractor or skyline cutting units.

Slash and other debris resulting from Purchaser's operations that has accumulated on landings that is greater than 1 inch in diameter or greater than 8 feet in length shall be piled for burning by the Forest Service.

Construction of landing piles: Piles shall contain little or no soil. Accumulations of soil that remain after Forest Service Burning will be leveled to normal ground contour. Slash piling operations shall not unnecessarily damage young growth or other trees to be reserved. Slash piles shall be located away from residual trees and young growth to prevent damage during pile burning. Dozers may not be used to pile landing slash on Cutting units designated as skyline yarding.
